## **Process Interaction:**

Core processes as related to customers diverse needs

## START-UP CONCEPT DEVELOPMENT

- Determine scope and strategic plan
- Analyze product framework defining fit and function
- Identify best option machine tool requirements
- CAD/CAM design review and optimization for manufacturability and economic impact including competitive tool design
- CAD/CAM time studies for cost estimation
- Develop quality control protocols

## Supply Chain Formation

- Supplier selection, review, and evaluation
- Risk assessment
- Production management
- Continual improvement
- Supplier monitoring
- Production management

- Generate colossal cost savings with advanced manufacturing processes and concepts
- Supplier re-evaluation auditing
- Diversify and maintain optimum supply chain route
- Strategize future success of operations in the hyper competitive and dynamic advanced manufacturing marketplaces

Advanced Evaluation
